

Wardiam ONE Detector

Features	Based on Ontech patented Controlled Magnetic Fields (CMF) technology Dual level detection capability; Preventive and Intrusion Discriminative detection Recognition of authorized entry via access control tag Easy guest access via momentary disarm button Tamper protection 24/7 continuous protection Capacitive touch keypad with backlight 95dba buzzer
----------	---

Dimensions	64 x 19.60 mm (diameter x height)
Weight	80 grams

Wireless communications	Wifi 802.11 b/g/n
-------------------------	-------------------

Wired connectivity	MicroUSB power supply
--------------------	-----------------------

Power supply and autonomy	6 months autonomy with internal 3.7V rechargeable battery
---------------------------	---

Electrode	Adhesive magnetic tape with silicone finishing
-----------	--

Environmental requirements	Working temperature: 0 - 40 °C Storage temperature: -20 - 45 °C
----------------------------	--

Certifications

CE/UL

Optional accessories

Access control tag for personal identification (Wardiam Key)

Box contents

Wardiam ONE Detector
Electrode
Screws for wall mounting
Optional adhesive pads for wall mounting
USB-Micro USB power supply
Installation and user quick guide
